

MSS Materials for the photovoltaic Industry

Through our national and international network we offer various materials for the photovoltaic industry:

Solar silicon ingot process

For ingot process MSS offers: polysilicon (chunks, nuggets, powder), recycled materials (top&tails, pot scrap, broken wafer, broken cells, IC wafers, etc.) crucibles, insulation, ingot processing services and other related products

Solar silicon Wafer process

For wafer process MSS offers: Ingots, blocks, saw bands, slurry, saw wire, ingot mounting adhesives, acids, wafer processing services and other related products

Solar silicon Cell process

For cell process MSS offers: wafers, metallization paste, screen, ammonia, isopropyl alcohol, phosphorous-oxychloride, silane, acids, hydroxide, cell processing services and other related products

Crystalline Solar silicon panel process

For cell process MSS offers: cells, ribbon, glass, backsheet, encapsulant, cable, junction box, connector, frame, panel processing services and other related products

Thin-film panel Cell process

For cell process MSS offers: cells, ribbon, glass, backsheet, encapsulant, cable, junction box, connector, frame, TCO materials, sputtering target, boron, cadmium sulfide, copper, gallium, germanium, indium, molybdenum, tin, phosphorous-oxychloride, silane, tellurium, oxides, selenium, alumina, panel processing services and other related products

In case of interested, please do not hesitate to contact us: info@mss-germany.de; or info@mss-worldwide.com
